#### KEY

- DS = Direct sow seed. Directly sow seeds into garden bed. Work out spacing and depth of seed required.
- TS = Transplant (Start indoors in containers and plant out seedlings in 4-6 weeks, when about 6 leaves on seedling.) Or buy seedlings (harden-off) before planting in garden
- X = depending on weather, they may not do well in these months

#### PLAN

- Consider plant requirements
- Soil Ph, compost and fertilizers added
- sun/shade
- spacing
- companions for optimal growth
- group water requirements
- rotation methods

#### NOTES

- Date planted: seeds sown/seedlings transplanted
- Harvesting method and dates
- Companion plants
- Maintenance undertaken dates
- Pest infestations and treatments
